Volume 1: Historic Roots

Volume One provides a groundbreaking approach by expanding the roots of psychology beyond the Greeks to concurrent events during the same period (800 BCE-200 BCE) defined as the Axial Age. The Axial Age emphasized seeking the universal connection that unites all humanity, a focus not on what one believed, but how one lived. This includes the human desire to connect to something greater, the totality of being human, explained by using symbol, the universal language.

Volume 2: Modern Development

Volume Two continues using symbol to deepen the understanding of psychological history as well as the importance of how one lives, an emphasis on engagement with symbols and with specific exercises, called emancipatory opportunities, to apply the lessons of psychological history to daily life.
